

Automated Commercial Environment—Requirements Recommendation

Date of Submission:		Requirement Due Date:	
Requirement Number:	MMM-HL-36	Scheduled Release:	
Requestor / Committee:	MMM	Trade Committee Co-Chair:	Verna Schultz
eCP Trade Lead:	Adi Abel / Steve Graham	Trade Subcommittee Co-Chair:	
eCP Tech Lead:	Kiran Gowda / Jim Davidson	Customs Co-Chair:	Thomas Fitzpatrick
Subject Matter:	Carrier Account – Crew Member Data		

Requirement

To allow all modes of transport to assign crew members to a voyage, flight, train or trip via the Manifest Portal utilizing the Crew data in the Carrier's Account.

Business Need

Currently, a number of government agencies (a few from DHS) are requiring the carrier to file a crew list. ACE, via the ITDS process, should enable the trade to submit a crew list and pass the data to participating government agencies. Since the data could be stored, at the option of the carrier, in an ACE Carrier Account, a carrier could draw crew members from the ACE account and assign them to a specific manifest. All interested agencies could then obtain the data from ACE.

Combine the Crew List prepared via the Portal with the Manifest submitted via AMS utilizing the "Trip Number".

Technical Need

See Business Need, above.

Benefits

Both CBP and the Trade can benefit from centralizing this process. CBP will have all modes of transport crew data on-line. CBP will bring the Air, Ocean and Rail into ACE processing earlier. Will utilize Release 4 functionality in Release 5. This would offer the carrier relief from filling the same crew list 4 times.

Risks

None
